

“Financial freedom is a Mental, Emotional and Educational Process” By: Robert Kiyosaki

About Us

More than ten years of experience in Forex, Stocks and Cryptocurrency Markets.

We are a group of well-experienced programmers and investors dedicated to the development of computer solutions and algorithms based on the automation and profitability of financial tools. Our services were born from the absence of efficient and productive tools in today's global market. In view of this need, we have developed software and indicators with the highest standards. They are capable of profiting and above all protecting our investment and that of our future partners and clients.

Please view our site for additional information: <https://stocksorforex.com>

Mission

Focused efforts towards the development, maintenance, and optimization of an effective technological platform. All this is to offer investment alternatives that are tailored to meet our clients' needs and requirements, offering permanent advice and professional monitoring, as well as security in our operations.

Vision

To be a leading international company in stocks, currencies, and cryptocurrency through the use of automated analytical software, technological and professional innovation, and hands-on market experience to built customer trust and provide great Return on Investment.

Goal

Offer a diverse investment portfolio opportunity to a wide range of investors through the use of our innovative tools for the generation of continuous profitable returns and risk mitigation.

Trading Methodology

"Never depend on a single Income. Make an investment to create a second source" By: Warren Buffett

We, at STKorFX, have two trading systems in place for your preference: Manual and Automated

- **Manual Trading System:** A trading process that involves human decision-making for entering and exiting trades.
- **Automated Trading System:** Employs computer programs that originate trades based on algorithmic or human-instructed criteria.

Manual Trading System

Our dedicated team will make the decision to buy or sell a particular asset after first careful study of multiple markets, data collection and trends forming and only then look for the opportune time to seize and execute the trade on your behalf.

Below represents a live statistical data of our manual trading history

Tickmill Ltd

Account: 5014497	Currency: USD	Leverage: 1:500	2021 October 17, 21:55

Automated Trading System

"To get Rich you have to be making money while you are asleep" By David Bailey

Introducing REMAS (Real-time Execution with Market Automated System).

The main principle driving this system is the inventive transformation of previous currency market data into specific technical indicators, chart patterns, and other statistical features. This data is analyzed, by our proprietary trading program, to generate specific trading orders.

Our team has put in years of analysis, development, optimization, to ensure the algorithm produces the best possible trading order, within the currency pair of study, and executes command in real-time.

Not only is the best entry and exit price computed, but the system is also continuously gathering real-time data, so that order price, is dynamically updated to ensure profits are locked and risk is mitigated.

With the REMAS, let the system work for you.

Below illustrates this algorithm in action, showing potential profit/Loss and drawdown.

Tickmill Ltd

Account: 10225680 Currency: USD Leverage: 1:500 2021 October 18, 11:50

Summary:

Deposit/Withdrawal:	1 000.00	Credit Facility:	0.00	Margin:	0.00
Closed Trade P/L:	190.18	Floating P/L:	0.00	Free Margin:	1 190.18

		Profit Trades (% of total):	12 (52.17%)	Loss trades (% of total):	11 (47.83%)

REMAS (Gold), system specific for gold, coming soon....

Trading Style

Detailed market analysis, using a combination of technical and scrutinized market study.

Trades are taken based on market behavior, so in the event there is stagnation in the market, no trades will be executed to ensure risk is minimized. With that being said, there will be periods when no trades are executed for days/weeks so that when the market shifts to trending the potential for profit increases.

Based on the market study, trades are performed using a money management ratio of 2 to 1 (There are conditions that unfold in which this ratio can go as high as 5 to 1).

Depending on the client's risk appetite (i.e.: Percentage of the equity risked per trade executed) the profit potential can be astonishing.

We have provided a potential reward vs. risk table based on an initial deposit of \$100,000.

Risk Appetite	Balance	Potential Profit	Potential Loss	Period
1%	\$100,000	\$ 73,340.00	\$ 13,655.00	6-12 Months
2%	\$100,000	\$ 146,680.00	\$ 27,311.00	6-12 Months
3%	\$100,000	\$ 220,020.00	\$ 40,966.00	6-12 Months
4%	\$100,000	\$ 293,360.00	\$ 54,621.00	6-12 Months
5%	\$100,000	\$ 366,700.00	\$ 68,277.00	6-12 Months

Growth in Profits and Returns

We do not guarantee success, but we build the metrics that define it; and guarantee that we will use our range of knowledge and experience to enhance our services so that it exceeds the expectations our clients and investors. Yes!! we thrive and are disciplined to accomplish success, because your trust and financial growth is our goal!!

STKorFX aims for a minimum return on investment of 24% per year while highlighting that this return can be generated with a minimum of 6 months and a maximum of one year.

Risk Management and Migration

"Every battle is won before it is fought." By: Sun Tzu

Disclaimer (*STOCKSorFOREX.com*)

STKorFX is not a registered investment, legal, third-party, dealer, or broker.

All trades executed by our team are based on market studies, analysis, research and experience, and because past performance is not a guarantee or indicative of future returns, your financial investment will and can fluctuate accordingly.

For this reason, we (STKorFX) use the following measurements to keep clients secure and provide transparency.

1. The investor's' account is registered under their own name and verified on the broker side (Tickmill) which is regulated by general data protection regulation (GDPR), Anti Money Laundering (AML), and Know Your Client (KYC).
2. All deposits and withdrawals are executed directly with the highly regulated broker's bank accounts; in our case (Tickmill).
3. The investors' capital and funds are always at the client's account under his/her legal name. *(We(STKorFX) will never ask to deposit any funds or payments on our accounts or third-party account).*
4. All trades are copied from our real VIP (50K+) accounts to the broker(Tickmill). STKorFX is so confident with our market assessment, that we risk our own capital, side to side with our clients so that when our clients are profitable so are we.
5. For the privacy & security of our clients and team, identities of both sides are never revealed to one another or third parties.

Disclaimer (*Risks Associated with Trading*)

Trading with financial instruments carries a high level of risk and may not be suitable for all investors. Before deciding to trade with financial instruments you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss more than your initial investment.

There is considerable exposure to risk in any financial instrument transaction. Any transaction involving currencies and financial instruments involves risks including, but not limited to, the potential for changing political and/or economic conditions that may substantially affect the price or liquidity of such currency or financial instrument. This means that any market movement will have a proportional effect on your deposited funds. This may work against you as well as for you. Not only may investors get back less than they invested, but in the case of higher-risk strategies, investors may lose the entirety of their investment. It is for this reason that when speculating in such markets, it is generally recommended to use only risk capital or, in other words, only use the money you can afford to lose.

You should be aware of all the risks associated with financial instruments transactions before becoming our client and seek investment, financial, tax, or other advice in advance if necessary.
